Fasten FEMA Funding With TARP: Get Free Technical Assistance for Your FEMA Hazard Mitigation Grant

Do you have questions about FEMA Hazard Mitigation funding? Do you need assistance with applying for a FEMA grant?

The NJIT Technical Assistance for Resiliency Program (TARP) provides free technical assistance to New Jersey counties and municipalities developing FEMA Hazard Mitigation Assistance grant applications.

At Fasten FEMA Funding with TARP, you'll hear a brief overview of FEMA's Building Resilient Infrastructure and Communities (BRIC) Program and Flood Mitigation Assistance Grant Program (FMA). Afterwards, Sean Vroom and Carrie Martin from NJIT TARP will be on hand to provide you with free technical assistance. Come prepared with any questions you have. These can include:

-  How do I know if I have an eligible project for BRIC or FMA funding?
-  How do I prepare for project scoping?
-  What other New Jersey projects have received funding in the past?
-  What data is available to help with my grant application?

Lunch will be provided.

Municipal and County Officials and Staff can register here:
