

Connected & Automated Vehicles: Planning for the Future

June 1, 2021

TPA
Tuesdays

As the NJTPA looks toward North Jersey's transportation future, connected and autonomous vehicles (CAVs) are expected to be a significant game-changer in the way people and goods move around. Part of the NJTPA's popular TPA Tuesdays series, this virtual symposium brings together key transportation and mobility leaders. Topics covered will include:

- Potentially transformational CAV technologies
- Assessing the region's infrastructure readiness and needs to support CAV policies and deployment
- Impacts on driver and pedestrian safety
- Freight industry, transit, labor, and industry impacts, and more

Agenda

I. Welcome Remarks:

- Mary D. Ameen, Executive Director, NJTPA
- Morris County Commissioner Kathryn A. DeFillippo, Chair, NJTPA Board of Trustees

II. Moderator Remarks: Dr. Mitch Erickson, U.S. Department of Homeland Security (retired)

III. Panelists' Opening Remarks:

- Solomon Caviness, Middlesex County Department of Transportation
- Dr. Peter Jin, Rutgers University Department of Civil and Environmental Engineering
- Dr. Jerry Lutin, Robotic Research, LLC
- Joseph Montano, Waymo

IV. Moderated Panel Discussion

V. Q&A

VI. Closing Remarks: Richard Cippoletti
